AGENDA

What is Integration Services?

Benefits to the Agencies

Accomplishments/Savings

Current Projects

How do I find out more?

Questions

What is Integration Services?

- Integrate enterprise application data internally & with agencies
- Use Publish/Subscribe Integration Model
- Reduce point to point connections
- Design Repeatable Patterns and Processes
- Reuse software and components
- Use system of record as source
- Support the State Websphere MQ Hub

Benefits to the Agencies

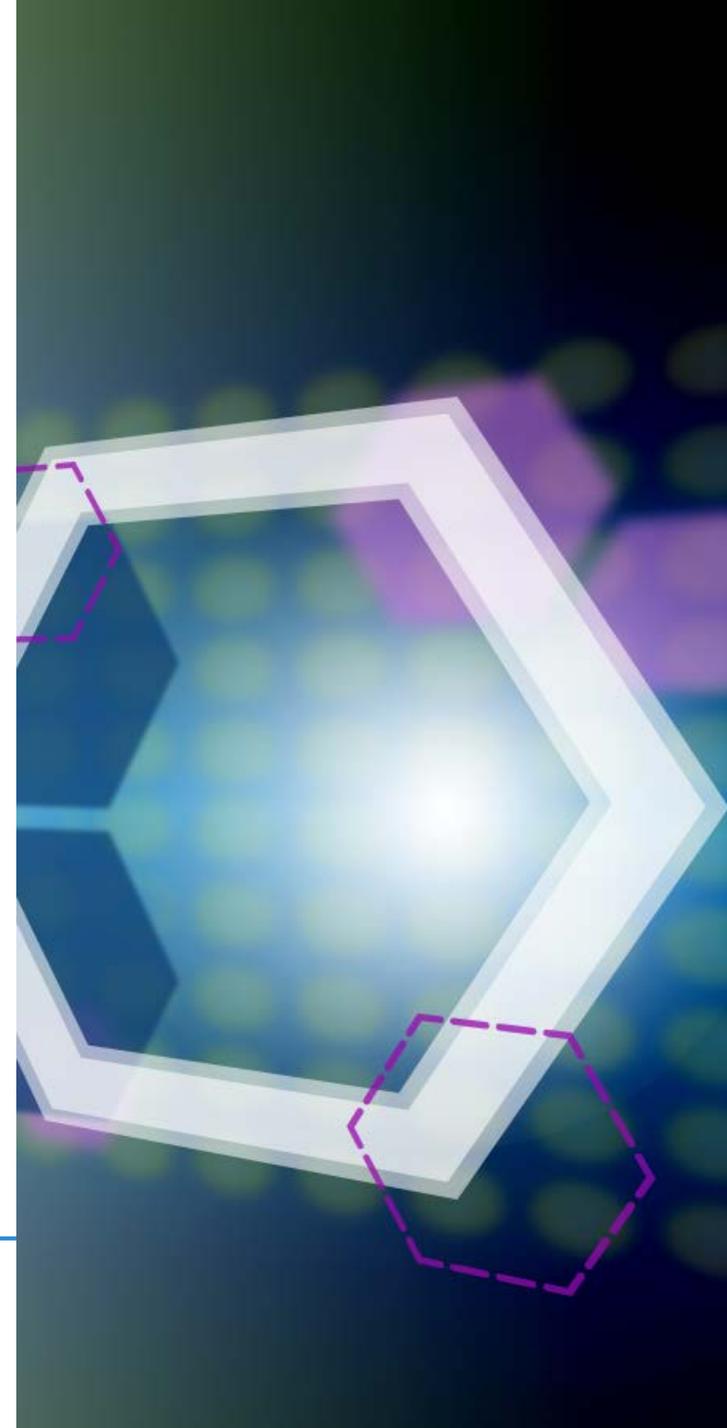

- Simplify receiving data from enterprise applications
- Only get the data your applications need
- Data in the format required
- Connect using the protocol required
- Streamline application to application data processes

Accomplishments/Savings

- AFRS COA to HRMS near real time
- HRMS interfaces:
 - Classification/Compensation data interface
 - HRMS/AFRS interface for Fleet application
 - Statewide HR data source
 - Employee data available near real time

Savings: reduced computer resources, staffing resources, reduced duplication of data, reduced processing time

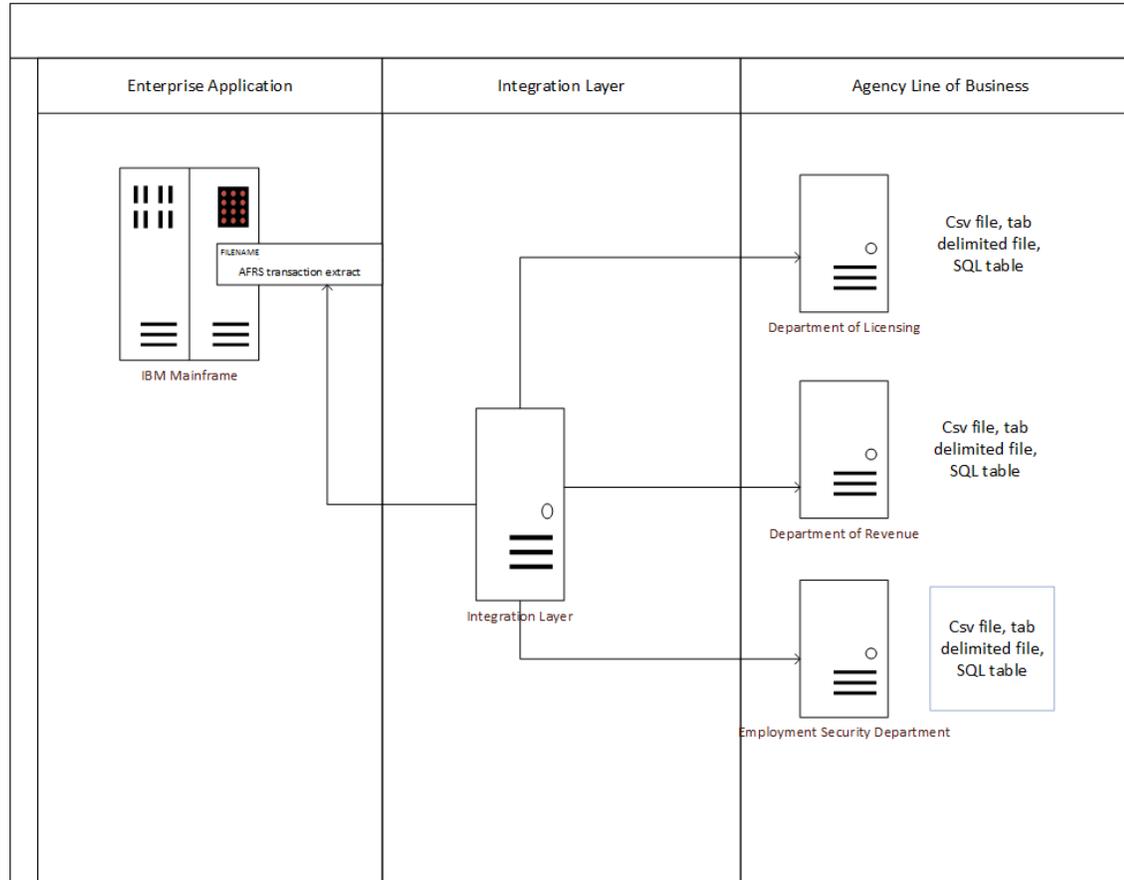

Current Projects

- WSDOT Actual Labor Project
- DRS MQ Connection to the Hub
- Active Directory to Gov Delivery interface
- ESD/DOR/DOL Legacy System Replacement

ESD/DOR/DOL Legacy System Replacement

QUESTIONS ???

Topic Name: Identifying Major Projects

Description of Activity Scope:

- Review current state: definitions, methods, criteria and timing for evaluating major projects
- Obtain TSB Subcommittee input and insight on major project characteristics
- Review research from industry and other states
- Evaluate lifecycle of projects/project risk

Deliverables Expected:

- Updated definition of a major project
- Updated draft criteria for determining major project
- Updated process for major project identification over life of project
- Draft of related content for updated Policy 121 and related procedures
- Metrics / Measurement recommendations

Anticipated Duration: Start January 14; deliver April 14; formal adoption June 7 - TSB

Topic Name: **Project Oversight**

Description of Workgroup Scope:

- Review current definitions, methods and procedures for 'project oversight'
- Review emerging 'technical oversight' requirements (we may want to do as a separate charter?)
- Obtain TSB Subcommittee input and insight
- Review research from industry and other states
- Evaluate oversight over the life of a project

Deliverables Expected:

- Updated definition of a project oversight over life of project
- Documented definition of technical oversight over the life of a project (we may want to do as a separate charter?)
- Updated matrix of major project & related oversight components (lifecycle view)
- Documentation of oversight triggers – what might bump a project to added oversight
- Identification of Metrics
- Draft of related content for updated Policy 121 and related procedures

Anticipated Duration: Three months (February & April 2016 Subcommittee Meetings)
